

## 5-in-5 Binary Telepathy Experiment

Experiment #:

Experimenter Name:

Subject Name:

### Instructions

You will hear a series of tones. After you hear a tone, try to discern whether the experimenter is thinking of a zero or a one. Check the box corresponding to your choice, then move on to the next box. There will be a period of five to ten seconds between tones. When you hear a tone lower than the ones that preceded it, the experiment is over, and the experimenter will arrive to collect this sheet.
